Dough Strip Machine

Characteristics

This model is used for individual and gentle production of dough strips. It eliminates the need for intensive manual strip production in small and medium-sized operations. Dough strip production for deposition in rattan baskets or plastic baskets

Dough strip size (h x w x l): 110 x 165 x 850 mm

Capacity: 4 strips per minute = 240 strips per hour

Absorption rate: 50-80%

Advantages

Semi-automatic production of 240 dough strips per hour

- High rationalisation and productivity effect
- Fast return on investment

Very consistent and reproducible dough strip production

- Optimised process security and product quality

All relevant components made from stainless steel or plastic

- Quick and simple cleaning
- short non-productive time

Hopper charging via Kemper Bowl tipper "HK 200" possible

- Maximum rationalising effect

RELAXER S

Specification

Standard version

Machine consisting of:

- wheeled stand
- charging device for baskets (at 1.000 mm height)
- Operation via two-hand safety circuit
- Hopper with a capacity of approx. 160 kg
- All machine components are made from aluminium, plastic or stainless steel.

Hopper opening:

Length: 720 mm

Width: 600 mm

Hopper consisting of 2 plastic side panels and 2 side panels designed as conveyor system.

The conveyor system can be oiled via a rotating wheel brush.

Hopper infeed height 1.830 mm

The hopper can be fed via a bowl tipper.

Options

- Add-on frame "RELAXER S" to increase hopper volume

Extras

- Rattan baskets and plastic baskets

Technical Details

Capacity

4 strips per minute = 240 strips per hour

Dough strip size (h x w x l) in mm

110 x 165 x 850

Absorption rate

50-80%

Dimensions (l x w x h) in mm

1.830 x 750 x 1.500

Connection parameters

400 V, 1 kW, CEE 16 A plug connector
